MUSABBIR RAHMAN

Web developer — landing pages and layout fixes | Jamalpur, Bangladesh
musabbirrahman.dev@gmail.com | +880 1330 792610 | musabbirrahman.vercel.app |
github.com/musabbirrahman

SUMMARY

I build clean websites that just work. My services are landing pages and layout fixes, delivered by message only — no calls or meetings. I work AI-assisted, then test by hand on phone, tablet, and desktop, and revise until the site works on the client's device.

SERVICES

- **Landing pages** — a simple page that explains the offer, shows prices, and lets visitors message to order.
- **Layout fixes** — broken mobile layouts repaired: sideways scrolling, cut-off titles, squeezed cards, buttons too small to tap, and stretched images.

WORK

- **Landing Page Demo** — fictional bakery demo: menu filter, order builder with a total and a message draft, offer banner, and FAQ. Demo form sends and stores nothing. musabbirrahman.vercel.app/demos/landing
- **GolpoNeer** (golponeer.com) — a live Bangla and English story platform. AI-assisted build that I directed, tested, published, and operate; I did not hand-code it alone. Method stated honestly on the portfolio.
- **Layout Fix Demo** — the same cards shown broken, then fixed, in a 360px phone frame: five named bugs, a code-diff view, and a checked-after-fix list. musabbirrahman.vercel.app/demos/layout-fix

SKILLS — CURRENT, DELIVERABLE NOW

HTML, CSS, JavaScript (ES6+) • Responsive design • Landing pages • Layout fixes • Mobile testing • Git and GitHub • Vercel deployment • Tailwind CSS • AI-assisted development • Manual testing • Contact and order forms

HOW I WORK

Message only, no calls or meetings. You send the brief, I build, I test on phone, tablet, and desktop, and I revise until it works.

EDUCATION

- **BSc in Computer Science & Engineering** — Brahmaputra International University, 2026 – Present
- **Higher Secondary Certificate (Science)** — Ghatail Cantonment Public School and College, 2025, GPA 3.67
- **Secondary School Certificate (Science)** — Lighthouse Lab. School and College, 2023, GPA 5.00

COMPLETED COURSES — CERTIFICATES EARNED, NOT CURRENT SPECIALIZATION

Programming Hero full-stack bootcamp (completed) • IBM React Development (certificate) • IBM Web Development Fundamentals (certificate). These are completed learning. A long gap without practice means I do not present that stack as my current specialization; it returns only after a refreshed project proves it again.
